Cr COVID Response

Your coordinated and compliant
COVID RESPONSE

Provide peace of mind to families and teachers

The COVID Response application provides a central location to address COVID testing, family notifications, contact tracing, attendance status, and other district requirements.

Dashboards inform educators of students' status at each stage of the COVID Response and the dates they're expected to return to school. Messages are sent to parents, presenting all the options for their child's testing and attendance after a close-contact exposure.

COVID Supervisors
> Template and send required communications
> Monitor trends in student exposures and absences

Nurses and Educators
> Enter observations of students who come to school sick
> Note close-contact exposures for family notifications

Parents and Students
> Report positive tests and symptoms
> Indicate quarantine plans and anticipated return date

Administrators
> Monitor dashboards of absences and positive tests
> Track trends and access copies of all notifications sent to families
