HIGHLY CAPABLE
LEARNING PLANS FOR YOUR EXCEPTIONAL STUDENTS

Go beyond traditional methods of identifying highly capable students. When you tap into more student data, you can discover more qualifying students, not just the ones who stand out as high achievers in every subject.

Once they're selected, participants' Highly Capable plan information is available to all their teachers, opening up opportunities for infusion and extended learning in the regular classroom.

CUSTOMIZE STUDENT SEARCH

Surface candidates for your Highly Capable program using criteria you select, or survey teachers for eligibility feedback.

INTEGRATED DATA

Automatically tie student assessments and achievements to HiCap plans, eliminating unnecessary data entry.
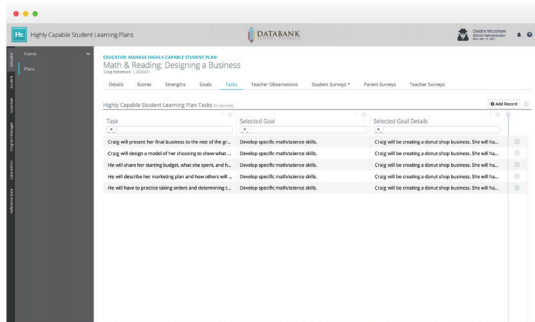

FLEXIBLE FRAMEWORK

Design your own service model, selecting standard learning goals and evaluation methods, for faster creation of new plans.
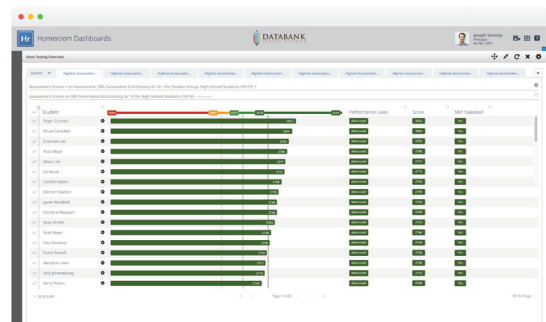

KEEP STUDENTS CHALLENGED

ENRICH THE EDUCATION OF STRONG STUDENTS WITH INDIVIDUALIZED, ACCELERATED LEARNING PLANS.
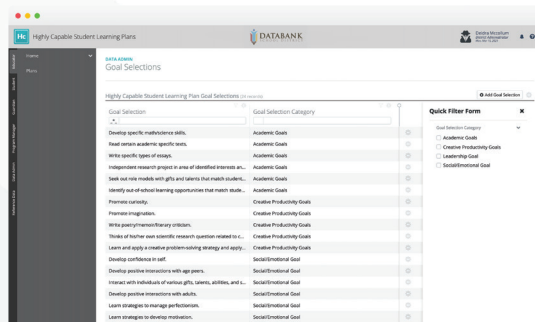

Discover how the Highly Capable application, integrated with SchoolData.net dashboards and charts, makes your gifted program more effective and inclusive.

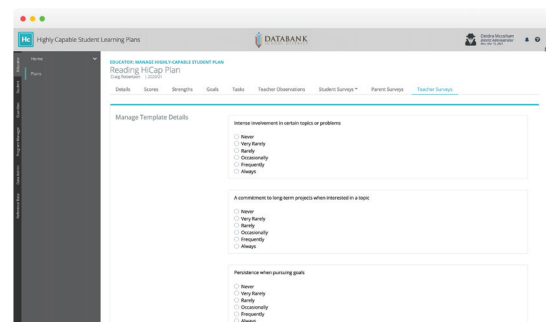

Break down student learning goals into concrete educational tasks to use as benchmarks in the child's achievement.

Filter on any data point, such as assessments or aptitude testing, to identify single-domain capabilities or otherwise exceptional students.

Customize and categorize the goals to be monitored in Highly Capable programs throughout your district.

Gather input from teachers, parents, and the students themselves to evaluate placement and understand opportunities for growth.

Develop students' talents in a personal way without adding to educators' burdens.
